

Coping with climate shocks:

A review of (im)mobility capability operationalizations

Student: *Gabriela López*

Supervisor: Prof. Dr. Olivier Sterck

Disclaimer: AI used to generate images and icons

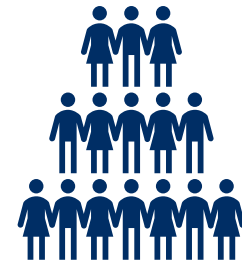

How many people do you think climate change could displace?

10 million

78 million

250 million

The immobility paradox

Internally Displaced People (IDRC, 2024)

83.4 millions

73.5 million

9.8 million

Structure and questions

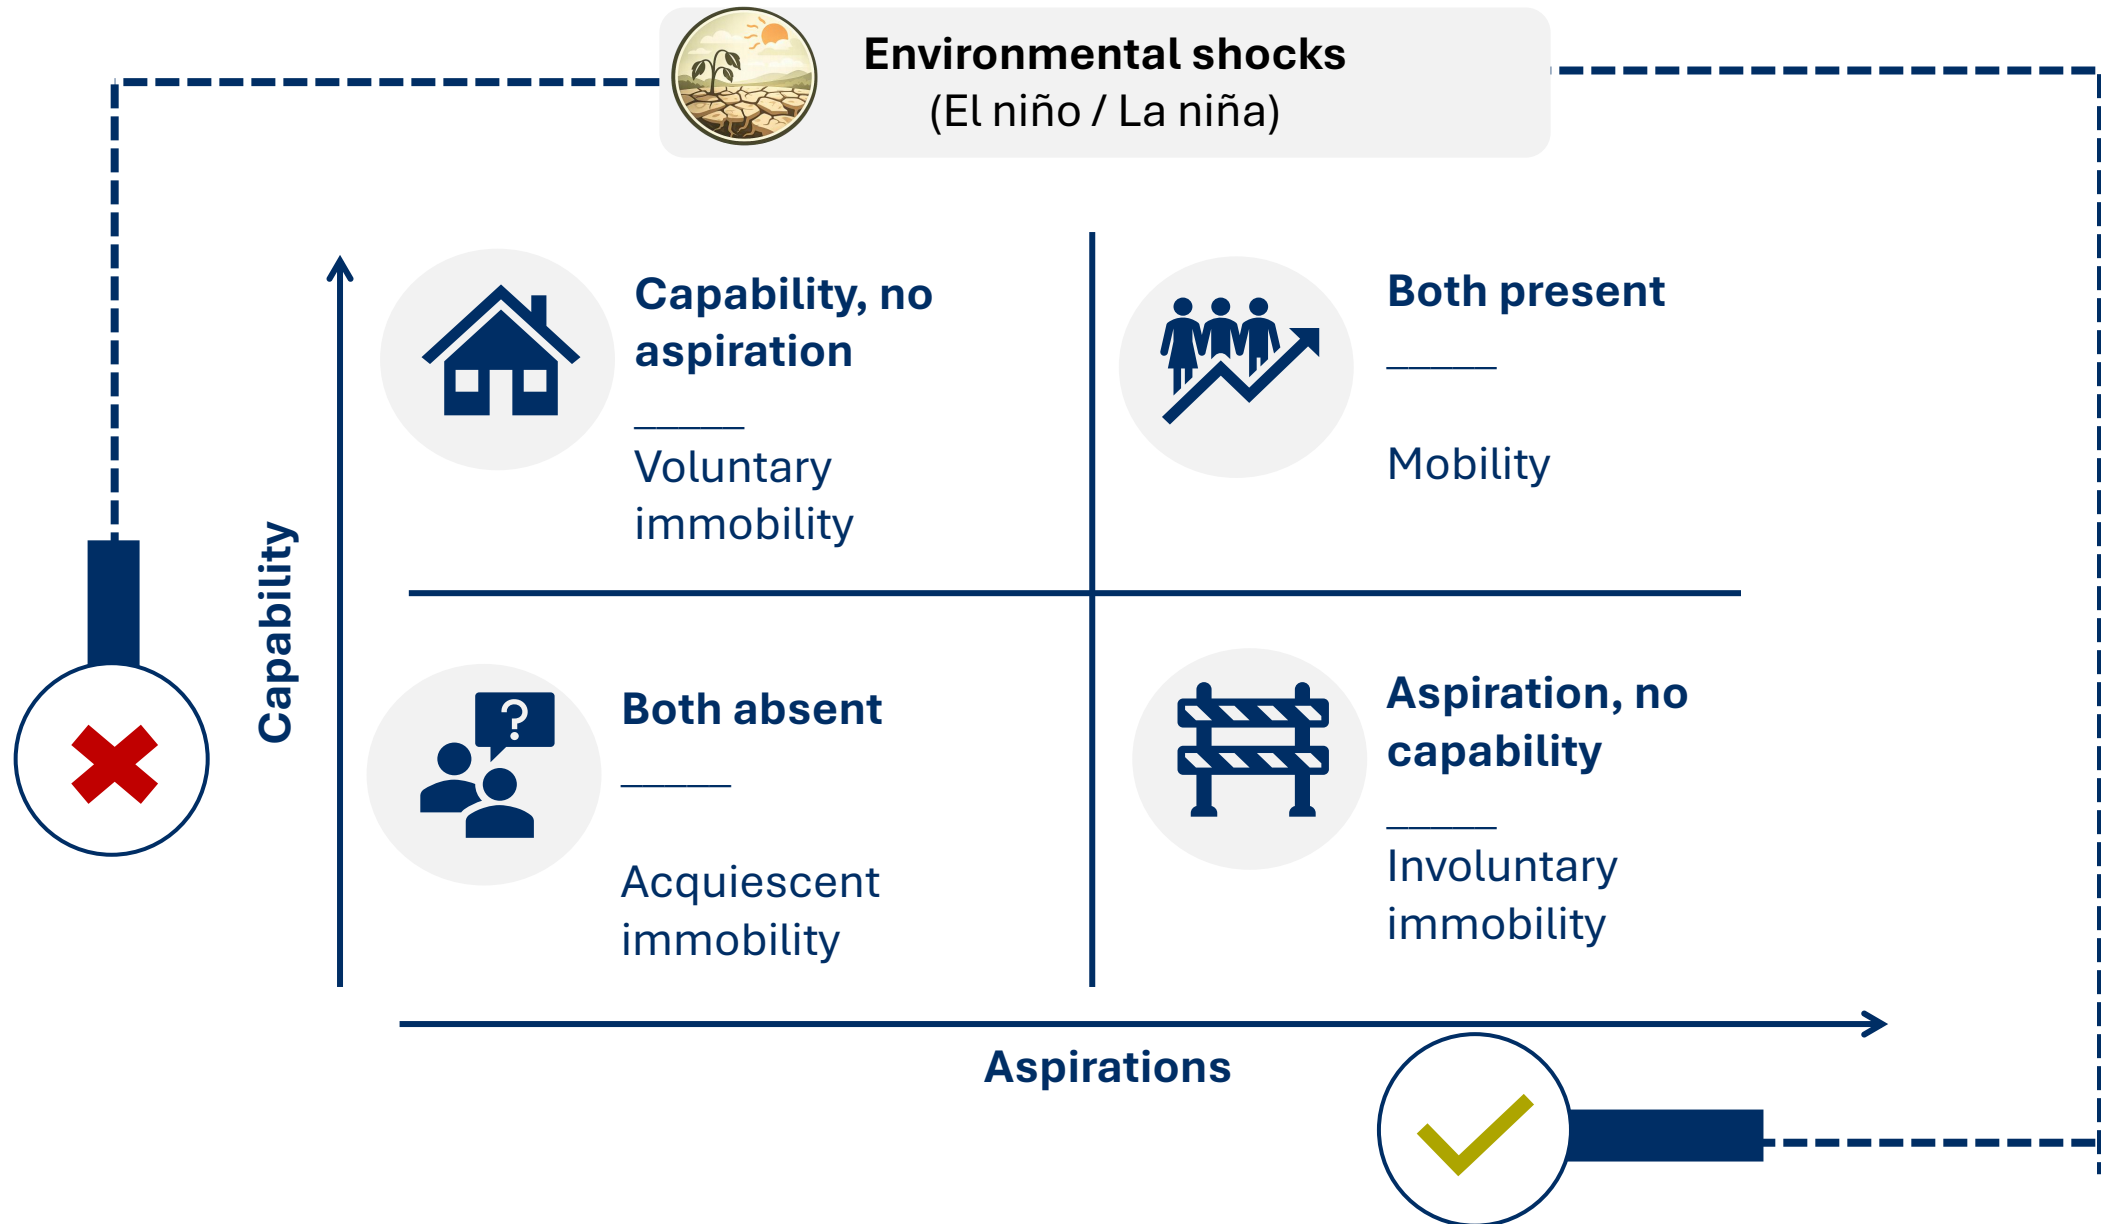

How is mobility capability conceptualized?

What proxies are used to measure it?

How do classifications change to the MxFLS data?

Aspirations-capability

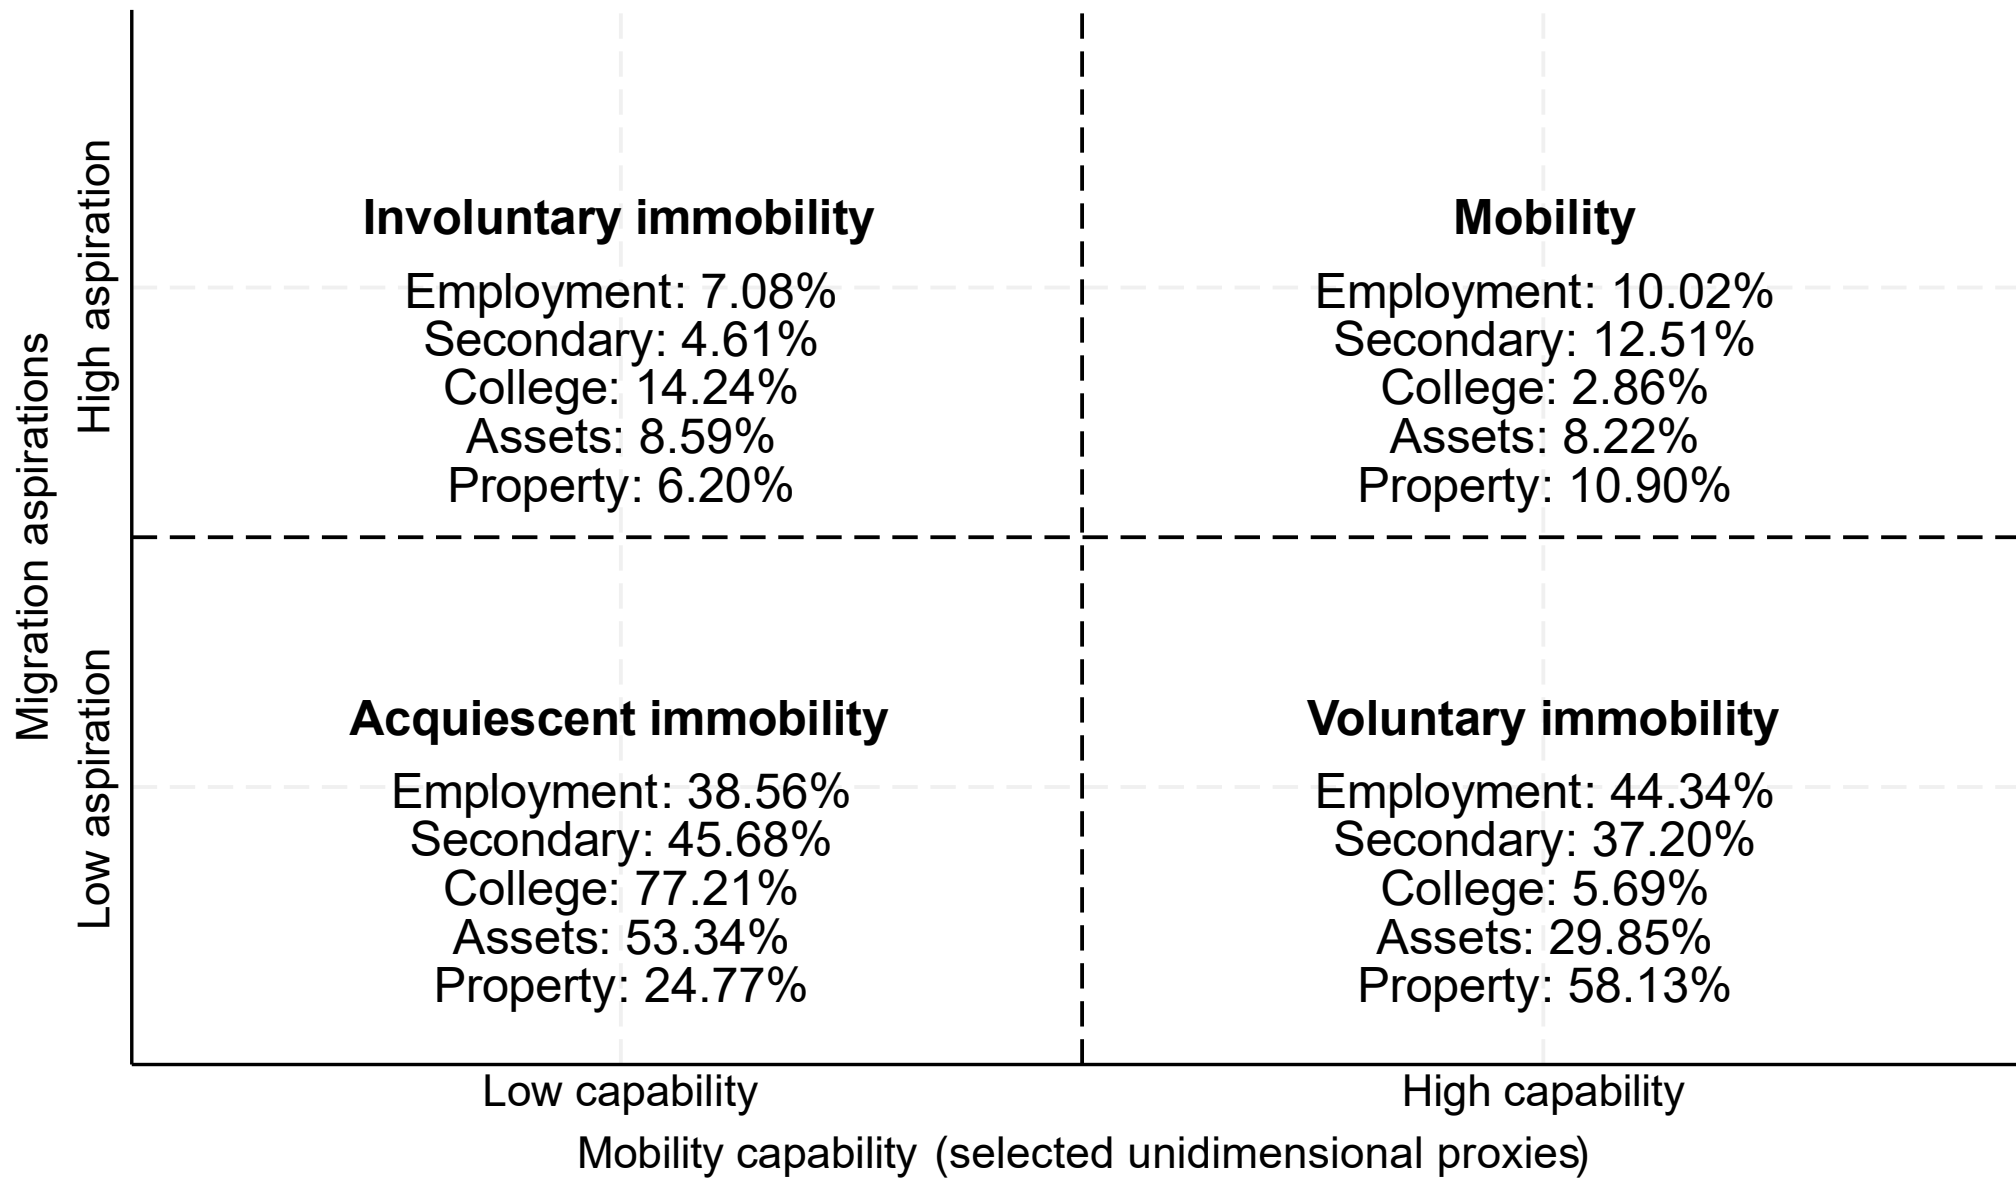

Source: De Hass (2021)

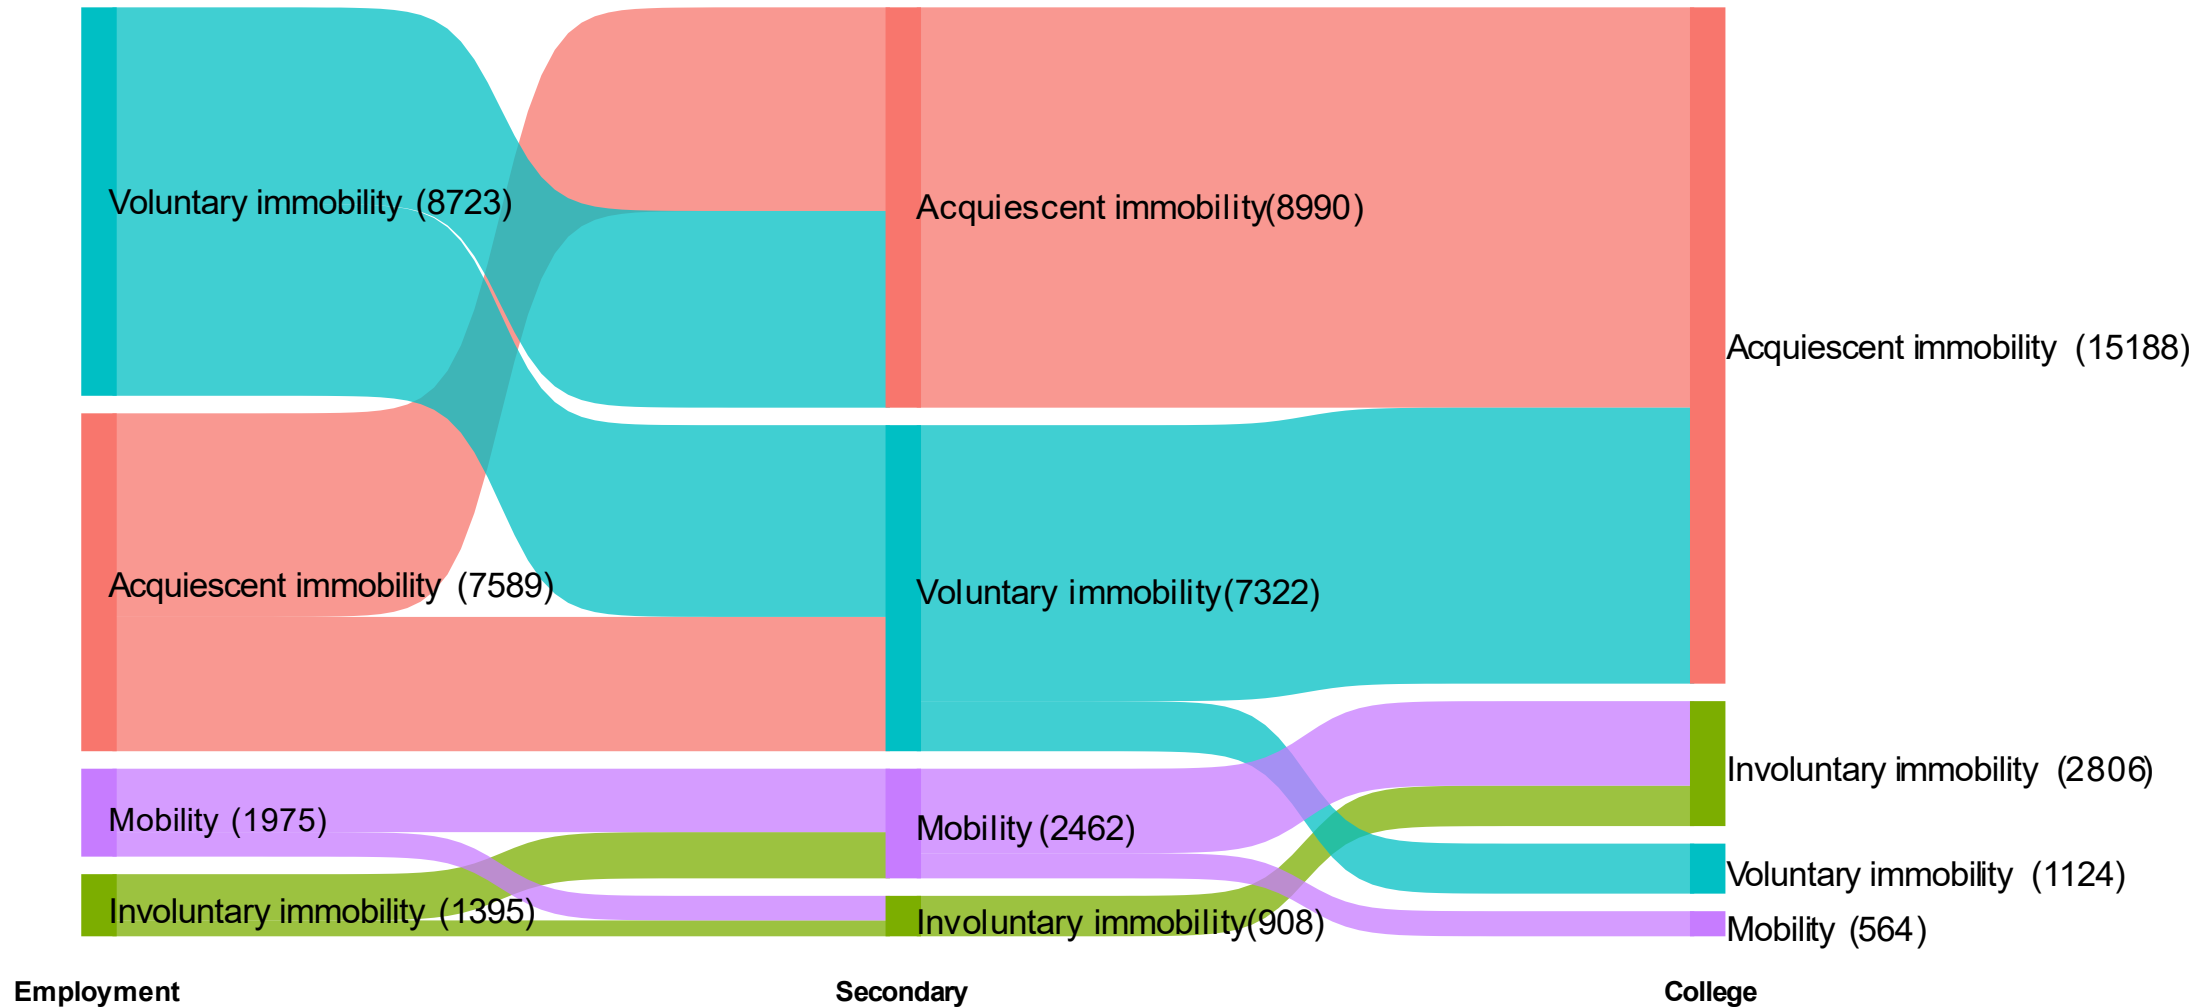

New Economics of Labour Migration

How is mobility capability measured?

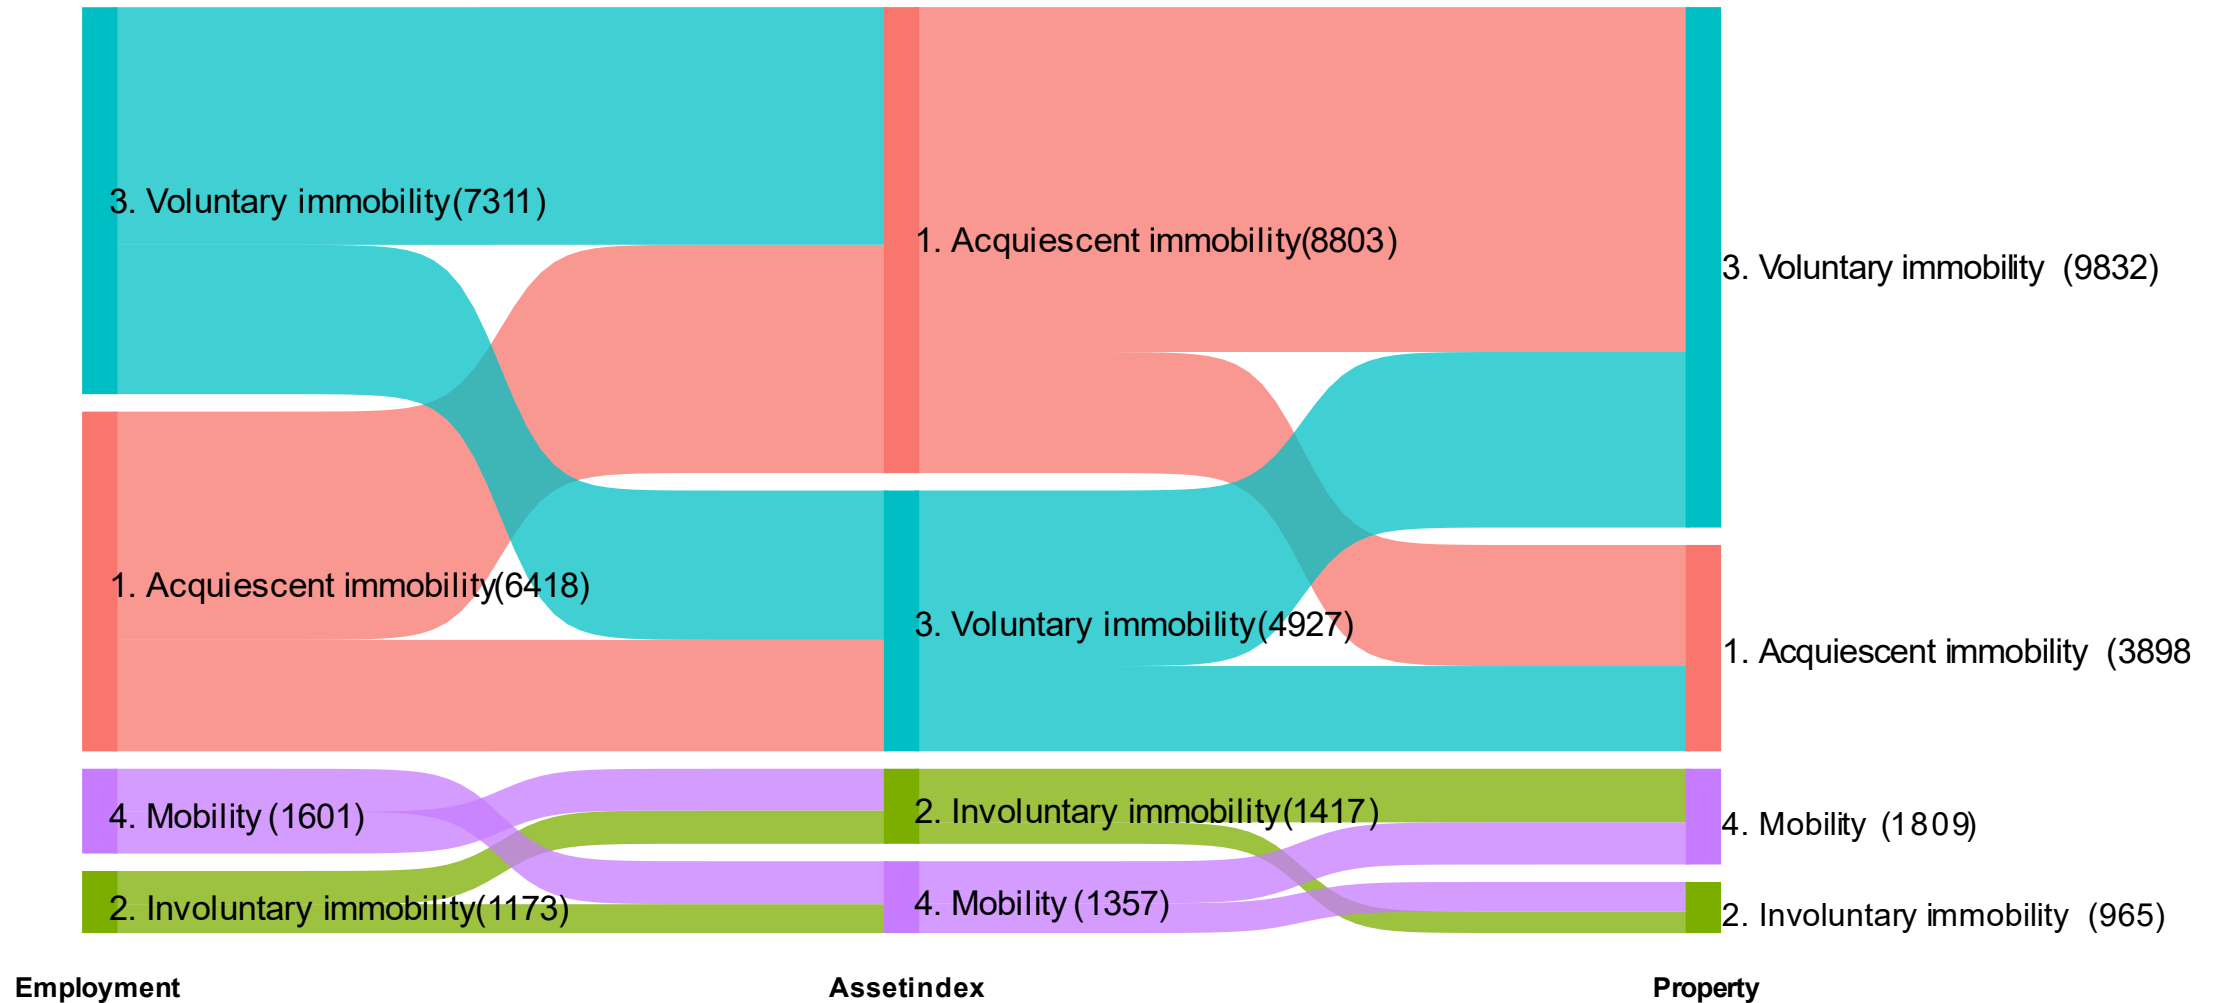

Changes in proportions

Transitions (employment and education)

Transitions (assets and property)

Conclusions and tentative recommendations
